We are driven by a justice system that instills confidence through its processes and is accessible to all citizens. Like you, equivant aims to embrace community while advancing justice and deliver better outcomes to all who touch the justice system. We do this through our deep domain knowledge, modern technologies, and expert services that help promote public and individual safety by informing decisions at every step.

As fellow stewards of justice, we are committed to your mission and we value your ideals. Our people operate with fairness and integrity, believing that there is no such thing as "good enough".

It’s your job to ensure that the administration of justice keeps progressing. It’s our job to deliver technology and services that help overcome challenges and support your success. For over three decades we’ve been doing just that, with systems that ensure accuracy, timeliness, and efficiency for hundreds of agencies coast-to-coast and internationally - delivering mission-critical software so that courts, public attorneys, and supervision officials can advance justice.

We employ approximately 135 professionals who are responsible for systems analysis, design, development, systems management, account management, training, and customer care services from our headquarters in Canton, Ohio and at regional offices across the country. On average, these staff members have more than seventeen years of experience serving the needs of the justice community.

Our implementations include:

• Over 500 court, clerk, and probation case management systems in single jurisdictions, integrated county- and circuit-wide deployments, and unified statewide initiatives. In Massachusetts, for example, we provide a web-based, completely integrated court case management system with over 4,000 users and approximately 2,900 concurrent users processing more than 1,000,000 cases annually. Other statewide implementations include Alaska and the rural courts of Nevada.

• More than 80 attorney case management systems for state, county, and city prosecutors and public defenders.

• Over 100 supervision, inmate classification, and risk/needs assessment systems which includes the Department of Corrections (DOC) in seven states along with numerous implementations in pretrial, probation, and sheriff/jail offices across the country.
• Many electronic services that increase access to justice, enhance public safety, and streamline operational efficiencies, such as eWarrants, eFiling, eCitation, ePayment, and other collections, bookings, and warrant exchanges.

• Sex Offender Registry Systems in three states.

• Justice and Public Safety Data Exchanges in over 20 states.

Our solution suite includes comprehensive person and case management, public access portals, risk and needs assessment, automated notification services, data-sharing/integration, and a host of complementary components that can be implemented stand-alone or in a complete cross-justice solution. We stand ready to assist in your mission.

Organization and Ownership
equivant is among a family of corporations under the umbrella of our parent company, Constellation Software Inc. In total, more than 200 companies comprise the Constellation Software Inc. subsidiaries.

Constellation Software Inc. (TSX: CSU) is an international provider of market-leading software and services to a select number of industries, in both the public and private sectors. Constellation’s mission is to acquire, manage and build market-leading software businesses that develop specialized, mission-critical software solutions that address the unique needs of particular industries.

For a more detailed explanation about how the Constellation Software Inc. family of companies is organized, please see the most recent CSI Annual Information Form at:
