Judicial Tools

Flexible, Efficient Software for Judicial Officers

Judicial Tools is a comprehensive case management tool designed specifically for judges and magistrates.

From the moment a new case is received, judicial officers can efficiently review, manage and update case files from anywhere, on any device. It's the one tool your judicial team needs for effective case management and at-a-glance decision support.

Judges can:

- Focus on the data, not navigating the system

- Actively manage cases both in chambers and on the bench and create location-specific case views

- View a quick snapshot of key data

- Configure dashboards by court, role, team, or individual to see case flow and performance statistics

- Access case histories, participant details, status of case activities, and more

KEY FEATURES:

Configurable for all case types

Easy-to-use calendar

Fast, flexible search function

Task queues to help structure to-dos

Customizable notifications and alerts

Pre-filled document templates

MANAGE YOUR CASES AND WORKLOADS EFFICIENTLY FROM ANYWHERE
