Northpointe Suite
Pretrial

### An evidence-based management solution designed for Pretrial Professionals

Northpointe Suite Pretrial is designed to provide relevant data to help agencies inform and effectively manage all phases of Pretrial while making critical decisions that directly affect public safety and a defendant's basic rights to due process and equal protection under the law.

Pretrial professionals can:

- Choose from a selection of validated Pretrial assessments that best suit your workflow, process and local legislation.

- Make Risk-Based decisions using numerous alternative screenings designed for specific populations such as domestic violence, substance abuse, DUI and mental health.

- Configure Pretrial Release Agreements with the capability to upload signed documents into the document management function for record keeping in one easy-to-use location.

- Provide a Pretrial case summary detailing key information such as bond recommendation, release conditions, and next court date for the judge and other stakeholders.

- Create agency specific reports with our built in Ad-Hoc data extractor or run any one of our stock reports defining outcome and performance measures.

Up-to-date records on all defendants to help monitor defendant related and case related details from the Pretrial release decision through sentencing.

Key Features:

- Library of Pretrial Assessments & Alternative Screenings
