

Discovery

for JWorks Attorney

Discovery for JWorks Attorney provides your agency with an easy-to-use document and imaging tool that increases office productivity and significantly decreases the hours you spend managing paper discoverable information packets for disclosure.

At the core of Discovery lies a powerful Media Manager in which all files associated with your case, report, or incident are stored. Examples of media items include:

- Scanned Documents
- Audio Clips
- Video Clips
- Photographs
- Word Processing Documents
- JWorks Generated Documents
- and more!

Discovery Package Creation

Once a report, case, or incident has been established you can begin creating an archive where related media files can be stored. From there, media archive information packets can be created and then shared with other agencies. For example, an electronic discovery package required for disclosure can be automatically generated by a prosecutor and shared with the public defender or the court. Any archived item can easily be selected and included in a discovery package.

Web Service Capability

Once a discovery package is created a notice can be sent by email to the desired recipient(s) directing them to a web site where the information package can be picked up. During the pickup process the recipient will leave an electronic signature verifying the date and time they obtained the package.

Other Important Capabilities

Additional capabilities associated with the Discovery module include:

- Ability to convert items and documents into a PDF format
- Package tracking options
- Archive and collection logs to maintain a record of progression
- Folder sealing options for security
- Automatic page numbering (Bate Stamping) to eliminate the need for manually numbering Discovery packet pages

Save Paper, Time, and Money with Discovery

Store and manage all forms of media for each case

Generate packages for each agency only once

Track your package at each step and each recipient

Benefits of Discovery for JWorks Attorney

Automated document and imaging system with our unique capabilities can have numerous benefits to your agency such as:

- Reducing the manual handling of information or discovery documents saving you time and money
- Decrease the time spent making physical copies of discoverable information
- Eliminate costly paper reams by storing electronically
- Decrease errors in transmitting discovery materials
- Create a discovery package once and transfer the information onto disk, CD, DVD, or the web service site whenever necessary
- The package tracking feature allows tracking of all information for any package when it was created, sent, and by what method it was sent
- Quick and easy access to all items or documents associated with a case online
- Multiple staff can share a file at the same time from separate locations

About equivalent

We are driven by a justice system that instills confidence through its processes and is accessible to all citizens. Like you, equivalent aims to embrace community while advancing justice and deliver better outcomes to all who touch the justice system. We do this through our deep domain knowledge, modern technologies, and expert services that help promote public and individual safety by informing decisions at every step. As fellow stewards of justice, equivalent is committed to your mission and we value your ideals. Our people operate with fairness and integrity, believing that there is no such thing as "good enough".
