

Jury Process Manager

Web-based Jury Solution

The web-based Jury Process Manager (JPM) solution provides a robust set of functionality in a hosted solution for Courts and Clerks. The solution allows the client to tailor codes to meet their needs.

The feature set of the JPM solution includes:

- **Annual Juror Draw** based on user-entered requirements and is randomized using random number generator applied to the loaded population, most pull from voter and driver registration data
- Comprehensive **Jury Term creation and management**
- **Update & create questionnaires** using templates and have **questionnaires filled out online**
- **Juror notifications** can be sent via Email or Text
- Desktop and mobile device-capable **attendance capture**
- **Self Check-in** can be used from a portal in the courthouse
- **Payment** can be created for one or multiple jurors, configured with tiered pricing based on days served, and exported to the treasurer in CSV format
- **Seating Chart** may be used during voir dire to manage available jurors or during trial for seated jurors
- **Code setup** is configurable to specific Courts

Key Features:

- Configurable juror questionnaire
- Configurable jury summons
- Comprehensive Juror Service Deferral process
- Forms Generation using Microsoft Word
- Kiosk-capable sign-in function
- Reports are executed using a custom batch control system
- Reports can be distributed via Print/PDF/Email
