

# JWorks for Courts

## Flexible, Component-ready Case Management for Courts

JWorks for Courts is a powerful information management solution for every step in the lifecycle of a court case. For court administrators, clerks of court, and judicial officers, it has never been easier to manage cases and workflows.

JWorks smoothly adapts to your processes, preferences, and local rules, and it helps you stay connected with national data-sharing support and seamless component integration.

### Court personnel can:

- Configure JWorks for any kind of case or docket, and create tailored screens, fields, and flow
- Quickly digest information with summary snapshots of individuals, claims and charges, events, and obligations
- Seamlessly integrate decision support and compliance tools
- Easily manage multiple calendars and track hearings, meetings, and other events
- Instantly find information with a flexible search function that can span cases, participants, calendars, and documents

JWorks for Courts is a dynamic, intuitive tool for next-level information management and exceptional efficiency. It's the flexible, adaptable technological foundation your court needs now and in the future.

### Key Features:

- Automatic case triage and pathway assignment
